

# Remote Screening Work Flow

## Pre Screening

- Collect ASQ, ASQ-SE (when appropriate), demographic information, and relevant records from parent (e.g., private provider reports, medical diagnoses)
- Schedule remote screening

## Screening

- Administer vision and hearing screening
- Administer BDI-2 screener for adaptive and personal-social skills
- Administer age-appropriate CCM screener for communication, cognitive, and motor skills

## Post Screening

- Administrative team reviews screening and determines outcome
- Results and outcome reviewed with parent
- Cases referred appropriately
