

Dear Family,

Your child's success begins with you! You are your child's FIRST and BEST teacher. They will learn the most about the world around them from you. This calendar has been created to provide you with an activity to try with your child every day of the summertime.

These simple activities don't require a lot of materials or preparation so you can fit them into your daily routine of spending time with your child.

The activities are designed to encourage development in the areas of:

Language and Literacy - the way children learn to communicate with sounds, words and gestures, and eventually, the way they learn to read and write.

Physical Development - how they move their bodies in physical activities and how they use their hands

Social and Emotional Development - begin to recognize and express their own feelings, and to understand and respond to the emotions of others

Approaches to Learning - how children deal with new environments, interactions, and discoveries

Mathematical Thinking - number knowledge, patterns, size, shape awareness, and the relationship between objects and space.

Scientific Inquiry - exploration and discovery of the world around them.

Social Studies - trying to make sense of the social and physical environments.

Please remember to use caution and supervision with all the activities.

If there is an activity that your child really enjoys, you can repeat it another day, as well as interchange any activity from one day to another. (If it is raining on a day that says to go outside, swap it out for an activity from a different day)

Most importantly - Take time to play and enjoy creating special moments with your little one - they grow up way too fast!

Your impact on their overall development will be significant and will last a lifetime!
