

Possible Considerations for this Classroom:

Provide plastic bins for storing materials that have been used – example, empty bins could be placed on the ends of tables or on top of cabinets for the children to use for putting books when they are finished and materials that they have used. Those would be collected after each segment of the schedule, cleaned, and returned for use later in the day or the next day.

Note social distancing. There would be room for the two boys seated at the end of the activity table to spread out even though they would not be able to share the game. Some of the chairs at that table could be moved away so that there are not so many choices for sitting.
